

June 4, 2011

Ms. Marlene H. Dortch, Secretary

Federal Communications Commission

445 12th Street SW

Washington, DC 20554

Dear Secretary Dortch:

Over the past two decades as a law enforcement official I am keenly aware of the role that technology can have in an emergency. I know that reliable and instant communication can be critical to law enforcement being able to effectively serve the needs of the community.

I would like to take this opportunity to ask for your support for LightSquared's plan to bring an innovative wireless telecommunications network to Illinois.

LightSquared has a history of helping first responders complete their missions by providing us with innovative and reliable mobile satellite communications during emergencies. To increase affordable and reliable communication LightSquared's plans to add a new -4G-LTE service to their satellite network giving emergency personnel an unprecedented level of affordable and reliable communications, allowing us to be more effective and safe at times when natural disasters wipe out other telecom capabilities.

LightSquared provides ubiquitous broadband coverage through a comprehensive terrestrial network and satellite capability.

I am asking you to support LightSquared in their work to provide affordable reliable communication network that would greatly benefit the law enforcement community.

Sincerely,

Sergeant Richard A. Kelly

Chicago Police Department
